

CentriPipe Spin Cast System

Terra has added AP/M PERMAFORM's CentriPipe Spin Casting System to our family of trenchless rehabilitation technologies. Designed by one of our experienced Professional Engineers, this trenchless installation method results in a fully structural pipe within the existing pipe without the cost associated with traditional dig and replace methods. CentriPipe Materials can be used on storm or sanitary pipe, constructed of brick, reinforced concrete, or corrugated metal, in sizes ranging from 30" to 144".

Why Spin Casting?

- Quick, *cost effective*, return to service with no excavation required
- Designed by a *Professional Engineer (PE)*
- Creates a *fully structural* pipe within the existing pipe
- Works on circular, elliptical and square pipe
- Maintains *full-flow* capacities
- *Completely monolithic* pipe with no joints

Why Terra?

- *Dependable* – in business for 47 years
- *Professional Engineers* with 20 years of trenchless technology experience
- AP/M PERMAFORM *Certified Applicator*
- American Shotcrete Association *Certified Nozzlemen*
- *Union* contractor
